AUREUS

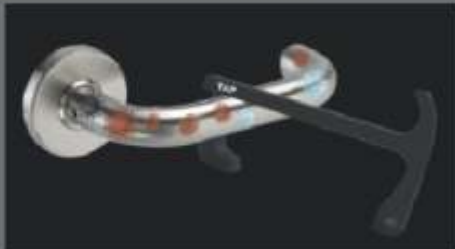

ESCHERICHIA COLI

Effects On Human Body

- Skin and soft tissue infection.
- Bloodstream infections
- Pneumonia
- Bone and joint infections.
- Diarrhea
- Abdominal pain
- Fever and vomiting.

Infected Surfaces

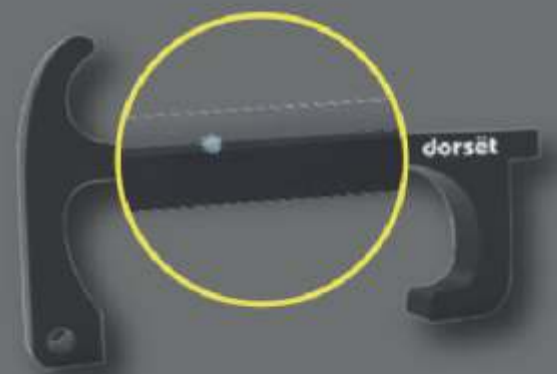

Touching unprotected surfaces is like shaking hands with hundreds of people every day and getting affected by microbes

Common bacteria can live and grow on for hours on unprotected surfaces, causing serious infections and illness.

TAP eliminates the need to touch potentially infected surfaces in our daily lives.

Antimicrobial Coating on TAP

TAP is coated with SAFE TOUCH, an unique transparent antimicrobial coating that protects you over repeated use.

We recommend sanitizing the TAP often with disinfectant wipe or sanitizer

We are not making any medical claims that TAP will cure, treat or in itself prevent anyone from being infected with the Covid-19 or other pathogens. This product is not a medical device.

TAP is designed to reduce direct contact with common surfaces that could possibly lead to avoiding germs.

TAP is not a substitute for social distancing, hand-washing or any other activity to maintain hygiene.
